

Carbon Reduction Plan

Ver4.0 Updated to reflect 2024 Figures

Supplier name: **Spinwell Global Limited**

Publication date: 19/07/2024

Commitment to achieving Net Zero

Spinwell Global Ltd is committed to achieving Net Zero emissions by **2050**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2020	
Additional Details relating to the Baseline Emissions calculations.	
<i>This is Spinwell Global first year for Carbon Emission Measurement as carried out by Earthly.org</i> (https://teams.earthly.org/profile/Spinwell-Global)	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	4.66
Scope 2	1.85
Scope 3 (Included Sources)	11.56
Total Emissions	18.07

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 This is due to Our work from home policy
Scope 2	0 This is due to our work from home policy
Scope 3 (Included Sources)	3.658.6
Total Emissions	3.658.6

Emissions reduction targets.

Our emissions have significantly dropped in the last year. We have changed our Carbon management Platform to Climate Essentials and this change in accounting may account for much of the difference. However we believe that we are a low Emitter in our marketplace we will continue to look at reducing emissions where possible. Progress against these targets can be seen in the graph below.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the **2020** baseline. The carbon emission reduction achieved by these schemes equate to **15 tCO₂e**, a **75 %** reduction against the **2020** baseline and the measures will be in effect when performing the contract

- *We have successfully switched to a 100% Work from home Policy which has made all commuting zero for staff.*
- *We also have ensured that as many meetings as possible are online rather than face to face with clients.*
- *We have also adopted policies of purchasing refurbished Electric Hardware where possible and a paperless desk policy.*
- *We are certified as being ISO 14001 compliant.*

Due to the limit of how much a company of our size and working practices can reduce our footprint, in the future we hope to implement/continue the following measures such as:

- We are encouraging staff to move their power supply to greener producers where possible.
- We will continue to assess our supply chain and endeavour to work with organisations that are also low emitters or Carbon Neutral.
- Continue to assess our purchasing to improve our recycling and refurbishment policies
- Continue to educate our staff with the appropriate training on environmental issues
- Encouraging Staff to implement their own energy consumption at home and in the workplace

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse Gas Company reporting².

¹<https://ghgprotocol.org/corporate-standard>

²<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Neil Dawes
